

# Native Gardens for Climate Resilient Landscapes

- Increasing temperatures are changing the duration of heat waves, precipitation patterns and the number of extreme weather events across globe.
- The quality of our air, water and soil are declining and habitats that support crucial ecosystems are disappearing.
- **We are in crisis, and it is time to act!**

# Climate Crisis

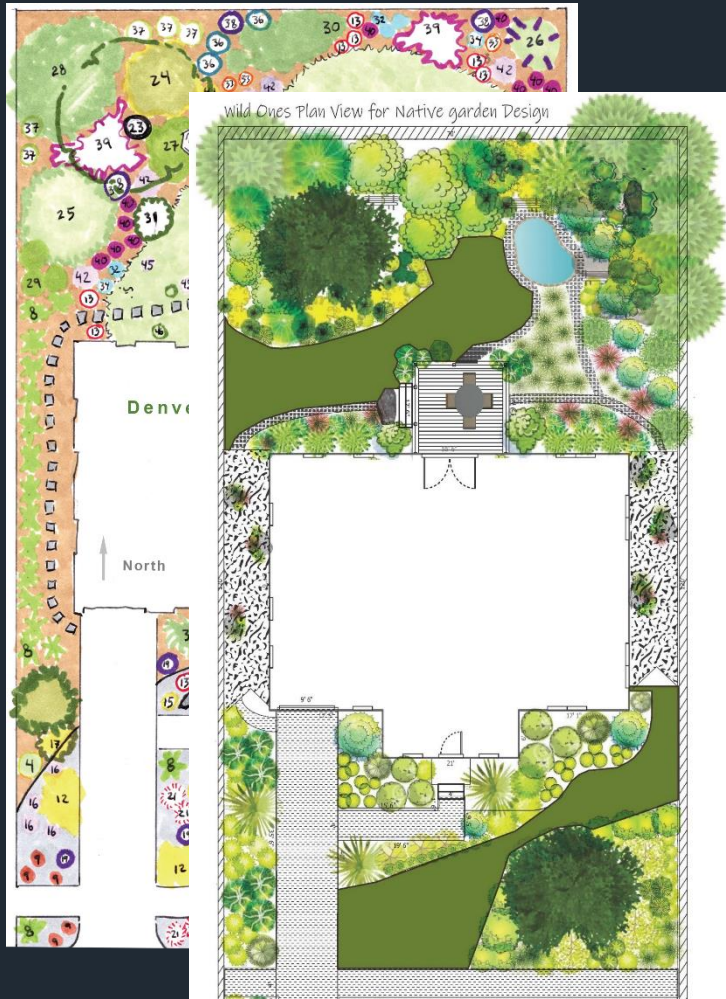

- Provide a practical, credible resource for beginner native plant gardeners.
- Give free downloadable native plant garden designs created by professional landscapers.
- Offer resources on how native landscaping can help slow down climate change and promote climate resilience.

## Program Vision

- Creating Your Own Native Garden Design – A guide for beginner native gardeners.
- Green and Beautiful Climate Resilient Landscapes – A guide to building a more resilient landscape.
- Sample Native Garden Designs – Inspiration to borrow from as you transform your landscape.
- Recorded webinars and interviews with the designers.

## Native Garden Design Program

## Native Garden Plans

- Designs include densely planted straight native species that favor plant diversity and provides food and habitat to wildlife.
- Plants selected to tolerate extreme periods of heat, sun exposure and drought.
- Designed to accommodate local water concerns such as periods of extreme rainfall, flooding in lowlands, changes river or tributary water levels, and eroding shorelines.

Thank you
